To Become A Perfect Man

- Mr. Victor K. Christian
(Teacher)

- You should remain calm and composed when all others around you are agitated and are blaming you for something gone wrong.
- You should trust your abilities when all others have no faith in them, but you should also give a thought to what others say about you.
- You should have patience and should never be tired of waiting.
- When others hate you, you should not hate them in turn.
- You should be humble and never assume to be too good, or talk in a manner that shows that you consider yourself wiser than others.
- You should be able to have a vision and make plans for the future but you should not let your plans and imagination alone dominate your mind.
- You must be able to think but you should not confine yourself to contemplation. It must be followed by action. You must be able to turn your dreams into reality.
- Sometimes wicked people will disport your words to disturb you, but you should be prepared for such situations. You should not be disturbed by such incidents.
- If you risk all your gains on one chance and loses all, you should be able to face the loss calmly.
- Even when you lose all your strength and energy, you should not give up. You should have the will power to keep struggling to win.
- You may be able to live with common people, but, you should not lose your noble qualities of character.
- In high society you should not become arrogant as to lose sympathy for the common people.
- You should remain unaffected by the actions of your enemies as well as your loving friends.
- All people should be equally important for you but they should not take you for granted or you should give them undue importance.
- You should make gainful use of every moment, without wasting a second.
- If you are able to do all that, I have written above, you will gain whatever you desire. Moreover you will be a perfect person.

THE TRAGEDY

- Saberfateema Dhukka (Std. 8-C)

Come, come, sit with me–
Let me tell you of an awful tragedy.

Our prophet cries because of this bloody history–
Shall we not brother and just sit idly?

Whether we are shiya or sunni,
Let me ask you,
is it wrong to love the prophet’s family?

Say: “I’m a Muslim, I dislike disunity.”
Say the truth,
tell everyone about the bloody history.
Art Of Giving

JULY 2015

Mrs. Sheena Binoy
(Primary Teacher)

In today's competitive and technological world we are all running around to achieve something. But do we get that 'something'? The adults are running to earn more, the young are striving to get good marks and to make up their career and become adults! Yet there is no stop. Our desire to get more and more keep us moving ahead in the crowd. Here, we need to stop and think where are we heading to... what are we going to achieve in the end of this run. There is no doubt a good living, good education and a need to acquire a secured future is necessary, but along with that we need to balance our mental health too.

How do we do that... one act that could help us achieve peace is the 'Art of giving', giving what! The word 'giving' brings to our mind 'poor', the poor people around us who are not as lucky as we are. That is why especially in our country we find people giving alms to the poor on big occasions like their Birthdays or religious festivals as it fills one with abundant positive energy.

But is the ‘Art of giving’ restricted to just giving alms to the poor and needy. No... there is more to it. The following would throw some light to the way we think about 'giving'.

1) Give yourself
   Give a little bit of your time to visit someone who is sick, a relative or a school friend. Also, give some time to your grand-parents, to talk to them for a while. You could also just casually give a call and talk too.

2) Give a gift of laughter
   Laughter is the best medicine so whenever you can make the environment lighter, do share a joke or a relevant interesting incident. And above all, stop complaining.

3) Give affection
   Offer a hug, a pat on the back, a touch on the arm or a tender look especially to younger ones. We never lose the need for affection and acceptance.

4) Give encouragement
   Everyone needs to be appreciated and praised. Often when one is low on spirits, giving a support by just talking to that person, that could boost up the energy level. Your peers who could not score well can be boosted up by your encouraging words!

5) Give without counting how much
   We always try to help or assist those whom we can get some help from... but try helping people who are poor and needy. After helping someone do not brag about what you have done.

6) Give forgiveness
   Everyone needs to grow and be successful in life. On this path often some many people hurt others' feelings. Most important is to 'give forgiveness' to those who hurt you. The more you carry hatred in within you, the more it would hurt you. So learn how to 'give of forgiveness'.

Ultimally 'The Art of giving' is actually a science to keep ourselves in good health, humour and make us confident. So, learn the 'Art of giving' and remain happy and blessed for the life we are given.
Education and Character-building

Student life is the Golden period of everyone's life. The qualities needed for making the path of life easy are best learnt in student age only.

The word ‘Education’ is derived from the Latin words ‘Educare’ and ‘Educare’. ‘Educare’ means to train, to bring up, to nourish; ‘Educare’ means to lead out. Thus education is a process of development.

The character of a nation depends upon the character of its citizens and today's students are the future citizens of the country. Therefore it is of utmost importance to develop some inner discipline and strength of character among the youth to build a strong nation.

Today it is noticed that most of the educational institutions lack the needed discipline. ‘Morality is universally acknowledged as the highest aim of humanity and consequently of education.’ Thus true education aims at character building.

Students must imbibe the qualities of ‘Right living and right thinking’. In school, the heads of the school and the teachers must create a favourable atmosphere for the students to build inner discipline and strong character. Teachers must play healthy influence on these young minds by setting a live example and mould them in the right way.

A strong character does not necessarily belong only to famous people. Often it is seen that noble and great qualities can be found amongst ordinary people also.

A sincere student who works honestly and with perseverance is also a person of strong character. To be honest, sincere, determined requires courage. Numerous incidents from the lives of great saints, social reformers, national leaders show us the path of life. Values like truth, honesty, courage give us spiritual strength.

Good habits learnt at tender age will make the path of life easy. Knowledge and education are not only for earning money. They teach us how to lead a good, meaningful, noble and satisfying life. Education frames our mind, moulds our thoughts and makes our character.

Here is an extract from the letter written by Abraham Lincoln, the 16th President of the United States of America to the Headmaster of a school in which his son was studying.

‘In school, teach him it is far more honourable to fail than to cheat. Teach him to have faith in his own ideas, even if everyone tells him they are wrong. Teach him to be gentle with gentle people and tough with tough. Try to give my son the strength not to follow the crowd when everyone is getting on the band wagon. Teach him to listen to all men. But teach him also to filter all he hears on a screen of truth, and take only the good that comes through.’

Today’s teachers and students must read this letter as they can learn a lot from this letter. This will make the path of life easy and bring real happiness, success and glory. That is the universal aim of education.

Mrs. Ishika Motiani

What kind of tree can you carry in your hand?

Ans. Palm
Who Am I?

A farmer found an egg in the woods, unaware that it was an eagle’s egg, he placed it under a brooding hen. Few days later, along with the young chickens the eaglet hatched. The hair among the blonde chicks made him distinct. However as time passed, it adopted the characteristics of the chicken and was accepted into the flock, except the occasional screeches.

Few days later it sparkled on the eaglet that few of his senior friends were missing and they never returned. Though he did not understand. He often heard painful death cries behind the farmers house. It sank his heart in agony and fear, wanting to run away. But around him was the big fence. He had tried several times to jump over it but all in vain.

One fine day the eaglet saw a beautiful bird swooping down and sitting over the fence. On its arrival, the farm turned chaotic but he sensed a strange feeling in his heart. So he stepped forward and kept staring as the bird had similar streaks like his. Then suddenly the bird began to screech and flap its wings, blowing a fresh rush of courage and inspiration towards the eaglet’s chest. Like a father inspiring his son. As the father eagle continued to flap his wings, the eaglet’s feet started to take-off the ground. He suddenly felt a gush in his wings, for the first time in his life. So he too started to flap with joy, gradually it lifted him a few inches above the ground. The sheer joy of being in the air and the purpose of the wings, made it evident why he was so different. He gradually flapped and flew over the fence, soaring up and high.

Are you being treated like the chicken or have you accepted the identity that others have put on you...? Do you struggle and strive helplessly to fit in...? Scriptures tell us, we are God’s unique creation... made to do unique work. We have not come to this earth accidentally nor we are the product of our past. We are the handiwork of a great, omniscient, omnipotent and omnipresent creator, designed and built for a purpose to live a life that would glorify His name.

Stop looking down, your mistakes do not define you nor do your failures. Pray to Almighty, the one who made this beautiful and wonderful world, stunning galaxies and amazing stars. Listen to the voice of the God (Who is the Generator, Operator and Destroyer) speaking in your heart. He loves you and has plans for you. He has the power to give you hope and rebuild your life. He says... ‘Look up, You’re born-to-fly’.

Midnight View of Sky!

Astronomy is an outdoor nature hobby. Go out into the night and learn the starry names and patterns overhead. Even if we live in densely populated city like Ahmedabad, there’s more to see up there than you might imagine. The ability to look up and say, “There’s Jupiter... Ohh... thats Saturn... its Orion...” will provide pleasure, and perhaps a sense of place in the Universe, for the rest of your life. For anyone completely new to astronomy, the first step is to become familiar with the night sky, how it changes through night and season by season, month by month.

★ Whats above this month of July?
Look to the western sky less than an hour after sunset, that stunning shining jewel is Venus. And right side to Venus other shining star seen is Jupiter. Wow! Two planets together. They are accompanied by the star called ‘Regulus’ creating different triangles each night.

On July 12 the star near to moon is Aldebaran
July 14 Venus and Regulus in West
July 15 New moon
July 18 Moon with Jupiter and Venus
July 23 First quarter moon
July 26 Moon with Saturn
July 28 Meteor Shower at midnight
(Delta-Aquariad Meteor Shower)
July 31 Full Moon

★ Delta Aquarid Meteor Shower
Want a wish from a falling star...? This month make a list of wish because not one but atleast 20 sightings per hour on July, 28th in midnight and early morning of 29th. This is a ‘Delta Aquarids Meteor Shower’. This meteor shower is the remnant of two different comets, Marsden and Kracht, but the light from the full moon on 31st will wash out all brightest meteors. It will be visible in the constellation Aquarius.

★ Topic of the Month
(Moon landing 20 July,1969)
Apollo 11 moon landing 46th Anniversary. “One small step for Man, one giant leap for Mankind”. Neil Armstrong, Buss Aldrin and the third astronaut Michael Collins from which Armstrong and Aldrin were the first astronauts and a man to successfully land the Lunar module ‘Eagle’ on the moon in 1969. Collins orbited in the command and service module ‘Columbia’. The mission duration was 8 days, 3 hours, 18 minutes, 35 seconds. Armstrong spent two and half hours outside the spacecraft, Aldrin spent less time. They collected 21.5 Kg of lunar material for Earth.

Well I hope the data and information given will open the doors for you in an Astronomical world and now just by gazing stars above, you become amateur astronomer. See you next month with more data and information.

RIDDLES

- Mrs. Ishika Motiani

What is greater than God, more evil than the devil, the poor have it, the rich need it and if you eat it, you will die.

Ans. Nothing
One day, the father of a very wealthy family took his son on a trip to the country with the express purpose of showing him how poor people live. They spent a couple of days and nights on the farm of what would be considered a very poor family. On their return from their trip, the father asked his son, “How was the trip?” It was great, Dad.” “Did you see how poor people live?” the father asked. “Oh yeah.” said the son. “So, tell me, what did you learn from the trip?” asked the father.

The son answered: “I saw that we have one dog and they had four. We have a pool that reaches to the middle of our garden and they have a creek that has no end.

We have imported lanterns in our garden and they have the stars at night. Our patio reaches the front yard and they have the whole horizon. We have a small piece of land to live on and they have fields that go beyond our sight.

We have servants who serve us, but they serve others. We buy our food, but they grow theirs. We have walls around our property to protect us, they have friends to protect them.”

The boy’s father was speechless. Then his son added. “Thanks Dad, for showing me how poor we are!”

Isn’t perspective a wonderful thing? It makes you wonder what would happen if we all gave thanks for everything we have, Instead of worrying about what we don’t have. Appreciate every single thing you have, especially your friends. Pass this on to friends and help them refresh their perspective and appreciation.

LIFE IS TOO SHORT AND FRIENDS ARE TOO FEW.

FASHION FEVER

The world is gripped by a fashion fever today. Human beings made clothes thousand years ago to protect their bodies from dust, heat, cold, wind and rain. However, today clothes have gone beyond the functions of protections and become an expression of our personality. People have started wearing clothes for style, fashion. It does not end only with clothes. People wear different kinds of shoes, bangles, earrings, rings and other accessories to match their style. Some people change their hair color, Mobile, phone and vehicles according to the latest fashion. Everybody wants to look attractive. This is normal but spending a lot of money wasting time in keeping up with the latest fashion is wrong. Fashion always keeps changing. Mental health is actually important and can be maintained by yoga, meditation and good amount of social interaction with friends and family. A person who is physically and mentally healthy can freely enjoy life.

So friends, I wish that you all will not follow fashion blindly.

Mind, Soul and Brain

The above statements are both amusing and true, at least in one sense: mind and matter are two components of reality, they are not reducible to one. This fact is of relevance to both science and spirituality, increasingly so as the boundaries of one begin to merge into the other.

Well, from the various kinds of researches carried out by the quantum physicists, it has been proved that soul is nothing but a religious word tossed for the power of energies radiated by the mind in the form of feelings and thoughts. Mind, on the other hand is a thing without matter like our feelings. Mind is a term equipped by the terms like sixth sense, thoughts effect of outer radiations and energies, inner illusions, strong faith, etc.

In short, the brain is the main centre of all processes including mind and soul. Soul – the word was given by our religions to give man the satisfaction that there’s something within us so strong and equipped with energies and with its emission, one can attract various similar energies around us. This whole thing is taken care by God – which scientifically is the Universe (where all energy is stored). Based on this, our religion created ‘Sanskars’, ‘Mantras’ (to thank Universe/God for giving us various things), rituals (for the feeling of togetherness of our society), etc. All this was done to increase the feel of satisfaction and happiness so that our brain radiates good energy to attract good things.

THOUGHTS (good, bad)

ACTIONS

SANSKRAS

(Good, bad)

(Good, bad)

It seems like our religion was based on many scientific facts. As some ignorant people didn’t know about the real facts behind our culture, they developed it into a chain of superstition.

So now you know what basically is mind, soul and brain.

RAIN → MIND → SOUL → FEELINGS/THOUGHTS(GOOD/BAD)

The Future Depends On What We Do In The Present. — Mahatma Gandhi

We all have seen how a sparrow makes its nest for its young ones. She knows that an eagle or some other big bird or the harsh storms and wind may come and destroy it. She also knows that one day when the baby sparrows are big enough and learn to fly they will leave this nest and would never come back. But yet, the sparrow builds the nest — painfully by picking twig and stems one by one. It is a sheer joy for the sparrow to do this, despite knowing the dangers that lurk ahead. This teaches us a short story lesson which is to be learnt from school as we should learn from school that, “Vinaash ke bhay se nahi rukta nirman ka sukh”

It is this same joy that can never be deterred in our TEACHERS, they too, like the sparrow keep putting their efforts selflessly for us and make us a better person. Thus, we should be thankful to our SCHOOL, our Teachers and last but not at all the least to our PARENTS, who gave us this wonderful opportunity to develop ourselves.

I joined Hiramani in its inception year itself, back then I was a small kid in 3rd Grade, who was awed by the grandeur of her to-be-school’s campus. The lush green patches of grass were everywhere to be seen. I would never forget what I learnt in my 10 years of schooling at Hiramani, be it the studies or the virtues, they will forever remain with me, unto my last breath.

I am glad that I have got an opportunity to interact with you people and get associated with my school again for a good cause and I would take this chance to convey that one day you all like me, will be out in this world from the safe cocoon called SCHOOL. Your problems will not limit themselves to just having not done your Homework but they will be a lot more. The life after completion of school is filled with Responsibilities. These responsibilities would consist of studying and performing well in college, getting yourself a good livelihood, fulfilling the requirements that are expected out of you in your respective jobs and consequently making your parents proud by performing all the duties to the tee and with this begins your life beyond School.

Amongst all this hustle and bustle of life you will certainly forget the basics that were taught to you back then in school. I urge you all, to kindly pay your attention to the first few pages of all your textbooks. The first page of every text book contains our NATIONAL PLEDGE and the very next page states our FUNDAMENTAL DUTIES towards the Nation. Have you ever thought WHY? As we grow up we forget these two things and shift our focus entirely on the Rights that our entitled to us. We forget our DUTIES towards our nation and we only remember as to what we can receive or take away from it.

There is a reason to include the National Pledge and the 10 fundamental Duties in the very first page of our curriculum of every subject’s textbook and the reason is that from the very beginning they want us to know that the ‘Responsibility’. Execution is demand of time, of present as well as future, towards the Nation is the Biggest and most Important of all the other things. I know this today and have chosen to help my country in any possible way be it being honest in my profession or not littering around or following the traffic rules or
not wasting water, fuel and other resources or treating everyone with equality or respecting my fellow beings, etc., etc. I as a senior from your very own School would like your approach to be similar as mine. I don’t say that choosing any specific career would show your dedication towards the nation; you can show it in every action that you do.

I cannot prove as to whether I practice what I preach but then again it’s not important too, what, matters is that if you want a clean, corruption free, democratic nation then you have to consider the nation first and all the other things after that. And as our teachers once invested their efforts selflessly upon us we too should return the favour by putting our efforts in the progress of our country.

Moreover, as rightly pointed out by Gandhiji the steps taken by me today, will give you a better tomorrow, similarly your efforts of today will give a better country to live, to the next generation. So don’t ever stop. Patriotism is not only showcased at the boundaries of a country but it should be portrayed in all our actions, in our day to day life. Be a responsible Citizen, once you are out of school because that is when it is most needed. All the best for your lives ahead.

He is my buddy
My best friend.
POEMS

THOUGHT WE WERE FRIENDS

– Shraddha Dave (Std. 9-C)

I always thought we were true friends, And those confident walks
But now we are at two different ends Today when I feel lost,
You forgot me, You’re the one I need the most
And I’m still wondering how could it be? But I know the truth
We are not apart What we had is never going to come back
And a new phase of life is about to start Life is never going to
You don’t need me Back to that same track
And I’m asking myself if I need you? I’m done with our friendship.
I’m wondering if our friendship wasn’t true It’s time to say goodbye
But really miss you And this time I know the reason why...
Miss your hugs The past is what we cannot amend.
How it was never ‘me’ I thought you were my friend
But always ‘us’ But right now you are
Miss our talks drifting to another end.

MASK

– Yahya Malvat (Std. 12-B)

There was a time indeed... with all their confirming smiles
People used to shake hands with their hearts, like a fixed portrait smile.
but that’s gone, dear. I have also learned to say, “Good bye”,
Now they shake hands without hearts, When I mean, “Good-riddance”,
While their left hands search to say “Glad to meet you”
my empty pockets... without being glad,
‘Feel at home! ‘come again’; they say, & to say “It’s been, nice talking to you,”
& when I come again & after being bored.
feel at home once, twice, But believe me, God,
there will be no thrice... I want to be what I used to be
For then I find doors shut on me... so show me, God,
So I have learned many things, dear, how to laugh, show me how...
I have learned to wear many faces like I used to laugh & smile...
dresses-homeface, school face, street face, Once upon a time...
hostface, cocktail face, when I was like a child.
**TREES OUR DEAR FRIENDS OR...**

Trees! our dear friends.
Bulging out of the seed
With the unique fancy trend,
Wear fruit garment studded with bead.
Your body covered with leaves,
Remembered me of primitive man
How your life and your sacrifices,
Can be gained by counting one to ten.
You spread your hands up in the air
And the creatures takes shade under you
They just prove you an item to be placed at a fair,
You believe to fill in their lives with hue.
But man should understand a thing
Not to kill a mouth less creature
If yes then where the birds will sing,
Considering it invaluable gift of nature.
With respect to seldom plea of a tree
Human should inculcate his feelings
And set it in the world so free,
That it should lend its fruits as greetings.

**SAVE WATER**

The leaky tap drips day and night.
Just fix it right or Shut it tight,
It seems the earth with water abounds
But thinks it’s every drop that really counts.
The tap is on, you brush your teeth,
The water flows, you soap your feet
Just think of all the water lost !!!
To close the tap, what does it cost ?
The water bottle you take to school,
The water in it is nice and cool,
You drink a bit, the rest you throw
The water could help a plant to grow.
So, Save water
And do your part,
It’s not a game,
Let the water last !!!
